The quality of this course is excellent since it teaches you the fundamentals of Bayesian Data Analysis which is very applicable to use in the industry and the instructor does a good job in teaching the materials. I highly recommend it to any statistics majors or other relevent degree seekers.
Great job!

I think that Daniel was a great GSI who really helped me learn the material a lot better and more clearly
He tried his best to make sure students understand the class materials and to help them working on the final projects. This class could have been a lot more confusing and difficult without him.
Daniel was a great GSI! He was always willing to help students, extending his office hours constantly and responding on Piazza within minutes. He had his own notes uploaded to Canvas and his own site to help students as well.
Daniel is easy going and super friendly! He handles questions from piazza and emails well.
